Description

Brass Tapware: Rhythm Bistro Stainless Steel tap

You should not sacrifice style for function - or vice versa - so we designed the Rhythm Bistro brass kitchen tap to provide you both. The sleek, modern design of the brass taps are made of stainless steel, which resist indications of wear over time, ensuring that your gold tap looks as good as new.

Use the brushed brass tapware pull-down hose to reach every area of your sink, then adjust the gold taps handle to get the perfect temperature you wanted.
